MAHMOOD-UL-HASSAN

Full-Stack Web Developer

Lahore, Pakistan | 0308-4386809 | mhassan43868@gmail.com | linkedin.com/in/mahmood-hassan43868

PROFESSIONAL SUMMARY

Computer Science graduate (BS, University of Management and Technology) with hands-on experience building full-stack web applications across the React and Node.js stack. Built an end-to-end e-commerce platform with authentication, product catalog, and cart checkout, and delivered custom Shopify Liquid themes for remote clients. Grounded in object-oriented programming, data structures, and relational database design. Seeking a Full-Stack Developer role owning features from database through to interface.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL

Frontend: React.js, HTML5, CSS3, Responsive Design, Shopify Liquid

Backend: Node.js, Express.js, REST API Design

Databases: MongoDB, SQL (schema design, queries, CRUD)

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Database Management, Version Control

Tools: Git, GitHub, VS Code, npm, Figma

EXPERIENCE

Shopify Theme Developer | Freelance / Contract Feb 2026 – May 2026

Remote

- Developed and customized Shopify Liquid themes for client storefronts, translating brand guidelines into live, on-brand shopping experiences.
- Rebuilt template sections with responsive HTML, CSS, and JavaScript, improving usability across mobile and tablet breakpoints.
- Diagnosed and resolved theme functionality defects and optimized asset loading to reduce page load times.
- Gathered requirements directly from clients in remote sessions and delivered every scheduled theme update on time.

PROJECTS

Order Automation System — Final Year Project Python, NLP, WhatsApp API

AI-powered WhatsApp order intake and delivery dispatch for Pakistani SMEs.

- Designed a system that captures customer orders sent over WhatsApp and converts unstructured chat messages into structured, actionable order records.
- Built the dispatch layer that routes confirmed orders to delivery handling and tracks fulfilment status end to end.
- Targeted small and medium businesses that manage sales manually over chat, removing repetitive order entry from the daily workflow.

E-Commerce Web Application React, Node.js, Express, MongoDB

- Built a full-stack e-commerce platform with a React frontend and a Node.js/Express REST API backed by MongoDB.
- Implemented user authentication, a browsable product catalog, and a persistent shopping cart with checkout flow.
- Organized the codebase into reusable components and modular API routes to keep features independently maintainable.

Library Management System C++

- Developed a library cataloguing and lending system in C++ applying object-oriented design and core data structures.

Student Database Management System SQL

- Designed a relational schema and wrote SQL queries supporting full CRUD operations over student records.

EDUCATION

Bachelor of Science in Computer Science 2022 – 2026

University of Management and Technology (UMT), Lahore

Intermediate (ICS – Physics) 2018 – 2020

Punjab Group of Colleges
